Optimize Your Hydrotherapy

A History of Quality...

Since 1982, we at Jason Hydrotherapy have been proud to share our passion of Better Living through Bathing. This is reflected throughout our rich history, the longevity of our products and our dedication to quality.

We were founded to fulfill the desire of developing premium hydrotherapy products and we continue that legacy of excellence. Ingrained with an innovative spirit, we are dedicated to making lives healthier by bringing you the benefits of bathing.

Since Jason Hydrotherapy's inception, we have stressed innovation with the belief that "success is in the details." Our company is steeped in a tradition of hydrotherapy firsts. With inspiration and engineering excellence, we have developed technologies such as: Ergospatial Design[™], Quiet Design[™] Engineering and Sani-Design[™], our revolutionary patented MicroSilk® hydrotherapy, and many more.

With our customers in mind, we have redefined the industry standards through meticulous craftsmanship and tireless engineering supported by our devoted belief in the many ways hydrotherapies can enhance your home and your health. Thank you for considering Jason as part of your daily life.

A Never-ending Flow of Innovation

lason was founded in 1982 on the promise of enhanced health and well-being for our customers. Years of consultations with physical therapists have helped us understand how the body can better benefit from hydrotherapy. We continue to combine these innovations with the best of today's trends and new materials.

1983 - Perfect Pressure/Perfect Flow™ jets

1984 - Ergospatial™ Design

1992 - Quiet Design™ engineering Patented Level form™ base

1995 - First jetted neck pillow in the industry. First to offer LED chromotherapy lighting in the USA

DESIGNER Collection

Classically elegant yet state-ofthe-art hydrotherapy choices.

INTEGRITY® Collection Traditional designs featuring Jason quality at a value price.

Zero-Threshold Shower Bases Elegant design meets accessible luxury

for those who are aging in place.

1996 - Sani-Design® Technology for whirlpools

1999 - First airbath produced in the USA (AirMasseur®) Sani-Design Technology for AirMasseur®

2001 - First combination Air-Whirlpool produced in the USA

2004 - First V-Drain[™] jet system in the USA. First Automatic Ozone sanitation system for baths

2006 - First bath Sound Immersion speaker system in the USA. First solid surface bath produced in the USA

2011 - First to introduce microbubble technology: MicroSilk®

2013 - Introduction of MicroSilk® Generation II and MicroSilk® Shower Wand

2015 - Introduction of MicroSilk® Generation III

TZ3260 Zero-Threshold Shower Base

The TZ3260 offers accessible luxury and functionality, perfect for those who are "aging in place". With its high-strength steel linear drain that's been recessed into and across the front of the base, the TZ3260 Zero-Threshold Shower Base by Jason Hydrotherapy removes the usual barriers to allow for easy access. The base fills the footprint of a standard bathtub and comes with Jason's patented Level-Form™ base, which makes remodeling easier and more affordable. In addition, the curbless base features a slipresistant texture and helps make bathrooms safer as millions of Americans adapt their homes to meet their changing needs as they age.

Available in three styles. Choose the one that best fits your needs.

AirMasseur® Hydrotherapy engages the light-touch receptors just below the surface of the skin and promotes further calming, relaxation and

healthy benefits of MicroSilk® and its oxygen-rich microbubbles with the more traditional whirlpool technology that provides deep, relaxing massage touch receptors.

(a) AirMasseur®

D3067F 67x29x26.8" (8)

A combination bath that delivers the benefits of both the new skinrejuvenating technology, MicroSilk® and AirMasseur® hydrotherapy, which stimulates the body's light-

MicroSilk® Hydrotherapy creates oxygen-rich microbubbles which reach gently into pores, increasing the skin's metabolism while promoting skin cell growth and reducing fine lines, wrinkles and scar formation. Research has also indicated that oxygen aids in increasing collagen production. For more information, visit www.MicroSIIk.com
